
THE QUEEN'S GAMBIT CHESS INSTITUTE

Curriculum

At the Queen's Gambit Chess Institute, we are dedicated to changing how youth learn. Chess is the new way of education. Our curriculum center creates individualized lessons to fit the needs of each student. Chess players at Queen's Gambit begin the curriculum process with basic chess instructions for specific levels. Then, students consider their academic and social goals and help to design their own curriculum. Using 21st century approaches to learning, Queen's Gambit's curriculum is inclusive, diverse, and life-changing. To quote female chess grandmaster Judit Polgar, chess is a miniature version of life. It is a portable classroom with every subject in school in one platform. At Queen's Gambit, chess is the new way of approaching, engaging and learning about the world.
